

Emerson College, Little Building Renovation Earns ENR New England Award of Merit

Published October 2018

We are proud to share the Emerson College's Little Building has been awarded the Award of Merit in the Specialty Construction category by Engineering New Record (ENR).

Four judges reviewed and discussed 36 projects located throughout the region, including Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont. Projects were evaluated on the ability of the project team to overcome challenges, contribution to the industry and community, safety and construction and design quality.

Vanderweil is providing LEED consulting services for this 250,000 gsf residence hall that is targeting LEED Gold®. LEED design includes a low impact site with energy-efficient measures that will serve as a healthy and productive space for its inhabitants, including staff, students and visitors.
